Social Care Wales

Our Strategic Plan 2022-27

Our vision

To make a positive difference to care and support in Wales for children, adults and their families and carers.

Our purpose

We provide national leadership and expertise in social care and early years. We lead on regulating and developing the social care workforce, service improvement and data and research to improve care.

The outcomes we want to achieve over the next five years

It is important we are clear on what we want to achieve and the differences and changes we would like to see between now and 2027.

These changes are set out in the following eight national outcomes:

Improved well-being for the social care and early years workforce	A registered workforce that has the public's confidence
A social care and early years workforce that is highly recognised and valued	A social care and early years workforce that is suitably qualified, knowledgeable and skilled with the right values, behaviours and practice
Social care and early years services that attract, recruit and retain people with the right values to meet the needs of those who need care and support	Social care practice and policy that is underpinned by innovation, high-quality research, data and other forms of evidence
Social care services that embed and deliver strengths-based approaches to care and support	Effective, high quality and sustainable services provided by Social Care Wales

Our five-year plan sets out in more detail why each outcome is important, how we will show change, and where we will focus our energy and commitment to work with you to realise our vision.
